## LIABILITY FORM

Thank you for choosing ES Products to perform your on-site roofing fastener withdrawal testing. We are pleased to be able to provide you with this service. ES personnel are fastener professionals trained and expert in the use and installation of ES fasteners. ES personnel are not roofers, roofing consultants, architects, nor roof specification experts. ES personnel are on-site solely and exclusively to provide you with assistance in selecting the appropriate ES fastener for your specific project. We strongly recommend you hire a qualified roof consultant and engineer to properly evaluate structural integrity, core samples, warranty compliance, code compliance and fastener density requirements.

Please read this entire document. By signing this form, you agree to be bound by the terms and conditions set forth herein.

1. Roof Repair of Test Areas. All materials and personnel required to effect repairs to areas of the roofing system compromised during the fastener testing and evaluation process must be provided by the contractor, building owner, or party requesting the services of ES Products. ES Products cannot and will not be responsible for effecting repairs to the roofing system nor will it be responsible for the integrity of the roofing system or any repairs made thereto prior, during, or after the performance of its services.
2. ES Products' liability in the performance of its services shall be limited to its personnel and the materials they provide in the performance of their services.
3. ES Products will be happy to provide you with a report on the testing of the performance of ES fasteners on your roofing project, provided that a representative sampling of various areas of the roof deck have been tested and an adequate number of tests performed. Ten tests shall be the minimum number required for the issuance of any evaluation report.
4. **Signing this form indicates you will be responsible for all repairs required due to the services ES Products provides.**
